

Eagle Eye Security Camera Video Management System

SECURE, RELIABLE, FLEXIBLE

- ✓ Highly scalable infrastructure
- ✓ Fully encrypted video and meta data
- ✓ Intelligent bandwidth management
- ✓ On-site or cloud video storage
- ✓ Supports IP and analog cameras
- ✓ Dedicated iOS and Android mobile apps
- ✓ Fully functional in all browsers

“The decision to use Eagle Eye’s Cloud Security Camera VMS was a no-brainer. It allows us to scale rapidly, the price is competitive, and the user interface is easy to manage. We couldn’t be happier with Eagle Eye’s solution.”

Kevin Davies, Common [Property Management]

“With Eagle Eye, we’ve been able to minimize the headaches associated with fraudulent damage claims that come our way. We can easily pull footage and send it to the appropriate parties. Plus, I can do it all from my cell phone.”

Ted Nevins, Henry’s Wrecker Service

The Eagle Eye Security Camera VMS is built for the cloud, providing reliability and redundancy. It’s ideal for servicing multiple locations and provides access to live and recorded video, from one or more locations, with a single login.
